Requirements

User Profile
- I want to be able to share what book(s) I'm reading
- I want to be able to share what book(s) I've read
- I want to recommend books to other people

Book Inventory
- I want to be able to create a list of books I've read
- I want to be able to create a list of book I want to read
- I want to be able to add/remove books from either lists
- I want to be able to sort the books by the following categories:
    - Alphabetical by Author
    - Alphabetical by Title
    - Alphabetical by Genre
    - Year the book was published
    - Source (Kindle, Nook, Physical, ect)
    - Want to read/read/reading
    - Sort by the rating
- Add book to inventory from current books we can get information about
- Have an option to automatically mark a book as unfinished if not finished in a certain time period.
- Add book to inventory by inputting all information manually
- Tag books as "want to read", "read", "reading", "unfinished"
- I want a rating system

Author Profile Page
- I want to be able to distinguish between an Author's page and a User's page

- I want to be able to promote my own books
- I want to be able to link offsite to where copies of books can be bought

Book/Genre Survey
- I want to be able to find new books
- I want the new books that are to my liking
- Enter books one has previously read for recommendations

Search
- I want to find other users with similar reading interests
- I want to see what other people are reading
- Search for books from a given year or period
- Friends/Followers list

Individual Contributions

Delan - Created part of the architecture plan and all of the use case diagrams. Also worked on key features and requirements for this milestone.

Helen - Contributed to the writing in milestones 1 and 2. Worked with Delan on key features and requirements. Adding tasks and organizing Trello.

Ben - Contributed to the wireframe layout. Designed the home page in a Netflix-like style where everything is right in front of you allowing the user to navigate to wherever they want in the website easily.

Joseph - made the site for Jira (we went away from this and made a board instead), did 1/12 of the figma, contributed to milestone 1 and 2 in the google docs. Made the Trello board for the group and set arbitrary deadlines. Attended ½ of the TA meetings so far. (missed the second by minutes)

Zach - Created Figma diagram showcasing our wireframe and what we have planned visually for the website.

Sayat - Created the Version Control and have edited the Figma diagram.
